ASHRAE Standard 140-2023

Test Results Comparison
for
Section 7 - Building Thermal Envelope and Fabric Load Cases 195-995 & 600FF-980FF

Results for TRNSYS18.06.0002
(TRNSYS18)
vs.
Example Results

Prepared By
Thermal Energy System Specialists, LLC
(TESS)

Results Developed
19-Aug-2024

ASHRAE Standard 140-2023
Computer Programs, Program Authors, and Producers of Example Results for Section 7 - Building Thermal Envelope and Fabric Load Cases 195-995 & 600FF-980FF

The programs used to generate the example results for Section 7 are described in Table B11-1. Under the "Computer Program" column, the first entry in each cell is the proper program name and version number. The entries in parentheses are the abbreviations for the programs used in the tables and charts of this workbook.

The second column ("Authoring Organization") indicates the national research facility, university, or industry organization with expertise in building science that wrote the simulation software.

The third column ("Example Results Produced By") indicates the national research facility, university, or industry organization with expertise in building science that performed the simulations. Most of the organizations that performed simulations are members of the development team for the simulation model that they ran.

See Standard 140, Annex B11 for further details.

TABLE B11-1

Computer Programs, Program Authors, and Producers of Example Results

Computer Program (Abbrev.)	Authoring Organization	Example Results Produced by
BSIMAC 9, Version 9.0.74 (BSIMAC)	Alec Johannsen Consulting Engineers, South Africa	Alec Johannsen Consulting Engineers, South Africa
California Simulation Engine, Version 0.861.1 (CSE)	J.R. Barnaby/C.S. Barnaby/Big Ladder Software LLC/Wrightsoft Corp., United States	Big Ladder Software LLC, United States
DeST 2.0, Version 20190401 (DeST)	Tsinghua University, China	Southeast University, China Tsinghua University, China
EnergyPlus, Version 9.0.1 (EnergyPlus)	U.S. Department of Energy, Building Technologies Office, United States	GARD Analytics, Inc., United States
ESP-r, Version 13.3 (ESP-r)	University of Strathclyde, United Kingdom	University of Strathclyde, United Kingdom
TRNSYS, Version 18.01.0001 (TRNSYS)	Transsolar Energietechnik GmbH, Germany; Thermal Energy System Specialists, United States	Transsolar Energietechnik GmbH, Germany
TRNSYS, Versions 17.02.0005 and 18.00.0017 (N/A)	Transsolar Energietechnik GmbH, Germany; Thermal Energy System Specialists, United States	Ecole Polytechnique Montréal, Canada[a,b]

[a] Ecole Polytechnique and GARD also worked on simulations for developing alternative constant interior and exterior surface coefficients, applying TRNSYS and EnergyPlus, respectively.

[b] Also checking input files versus the Transsolar participant's files and vice versa.

Note: Results for "TestSpec-Alt" are shown in Table B8-16 and in Figures B8-6, B8-H10, and B8-H11; contents of tables and figures are further described in sheet tabs labeled "Table List" and "Figure List". "TestSpec-Alt" results are alternative values resulting from optional alternative inputs for sky temperature provided in the test specification (see Section 7.2.1.1.1.2 and Annex A1, Section A1.1.1.2).
